

ABSTRACT OF THE DISCLOSURE

A versatile envelope assembly that can be printed upon either before or after the resulting envelope is assembled. The resulting envelope can be used to store a wide variety of items, including compact discs and digital video discs, and can also provide a label for labeling the items contained in the envelope. The label is specially designed to extend the life of compact discs and digital video discs when applied to these items. Furthermore, the resulting envelope can be used as a mailing envelope, a filing pocket, a ring-binder pocket, or for any other suitable use.
